

Online Services Responses Validation Process

In order to validate Services Responses following online JSON Schema Validators are available:

<http://www.jsonschemavalidator.net/>

<https://json-schema-validator.herokuapp.com/>

To validate services responses copy the content of the schema from the schema file and paste to the Schema Panel. Copy the services response content and paste it to JSON input panel. The response schemas all services are listed bellow

auth

Success Response Schema: auth.json

Failure Response Schema: error.json

site-details

Success Response Schema: site.json

Failure Response Schema: error.json

manifest

Success Response Schema: manifest.json

Failure Response Schema: error.json

manifest-tracking-numbers

Success Response Schema: values.json

Failure Response Schema: error.json

site-ids

Success Response Schema: values.json

Failure Response Schema: error.json

density-uom

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

form-codes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

source-codes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

federal-waste-codes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

state-waste-codes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

management-method-codes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

printed-tracking-number-suffixes

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json

proper-shipping-names

Success Response Schema: values.json

Failure Response Schema: error.json

id-numbers

Success Response Schema: values.json

Failure Response Schema: error.json

id-numbers-by-shipping-name

Success Response Schema: values.json

Failure Response Schema: error.json

proper-shipping-names-by-id-number

Success Response Schema: values.json

Failure Response Schema: error.json

hazard-classes

Success Response Schema: values.json

Failure Response Schema: error.json

hazard-class-by-shipping-name-id-number

Success Response Schema: values.json

Failure Response Schema: error.json

packing-groups

Success Response Schema: values.json

Failure Response Schema: error.json

packing-groups-by-shipping-name-id-number

Success Response Schema: values.json

Failure Response Schema: error.json

emergency-numbers

Success Response Schema: values.json

Failure Response Schema: error.json

emergency-numbers-by-id-number

Success Response Schema: values.json

Failure Response Schema: error.json

container-types

Success Response Schema: code-descriptions.json

Failure Response Schema: error.json
